Welcome to the Advanced Level ISO 31000 Course! - Corresponding title: **CRMIP®**

"Certified Risk Management Implementation Professional in accordance with ISO 31000 - Advanced Level"

In today's complex business landscape, effective risk management is paramount as organizations face increasing uncertainty and evolving expectations. The impact of unforeseen events can be profound, making prioritizing risk management imperative for all, including SMEs. ISO 31000, a standard introduced in 2009 and revised in 2018, is a crucial tool to help organizations navigate these challenges.

The updated ISO 31000 standard, released in February 2018, has had a profound impact globally, offering best practices, structure, and guidance for risk management professionals. Now integral to all management system standards, following the ISO High-Level Structure (HLS), ISO 31000 is indispensable for every manager.

Understanding ISO 31000 is valuable, but translating its guidelines into actionable steps is the real challenge. Our Advanced Level ISO 31000 Course is designed to bridge this gap. Beyond theory, we provide practical insights and strategies for effective implementation. Join us to unlock ISO 31000's full potential, turning its principles into tangible benefits for your organization. Lead with confidence in managing risks and driving success.

ISO 31000 Risk Management Implementation - CRMIP® Certification

This course enables participants to become:
Certified Risk Management Implementation Professional in accordance with ISO 31000 (Advanced Level).

Embark on a transformative 5-day journey with our interactive ISO 31000 course, designed for advanced-level professionals. This immersive experience goes beyond theory, offering hands-on learning to empower you in tailoring the ISO 31000 framework to align seamlessly with your organizational needs and aspirations.

Throughout the program, you will delve into the intricacies of adapting the ISO 31000 framework and process to harmonize with your organization's governance practices. Guided by seasoned experts, you will craft bespoke policies, plans, and procedures, integrating robust risk management seamlessly into operational processes across all organizational tiers. Discover how to connect and synchronize these elements with your existing organizational practices, fostering a comprehensive risk management culture.

Take home not just theoretical knowledge, but tangible inspiration for immediate action within the boundaries of your mission and control. The course structure ensures a dynamic learning environment, where participants collaboratively work on real-life cases. Benefit from shared insights, general examples, and diverse models that will fuel your creativity and strategic thinking.

Beyond knowledge enrichment, this 5-day course positions you for the coveted CRMIP certification. Attain the prestigious title of "Professional Certified in Risk Management Implementation in accordance with ISO 31000 - Advanced Level," a testament to your expertise in implementing the ISO 31000 standard.

Elevate your professional profile with this certification, showcasing your profound understanding of ISO 31000 and your ability to effectively implement its principles, build its framework and integrate its process. Join us for an unparalleled learning experience that not only broadens your skill set but also equips you with a recognized credential that speaks volumes about your commitment to excellence in risk management.

LEARNING OBJECTIVES

- To understand and be able to implement the ISO 31000 principles, framework and risk management process, customized to your organisation.
- To understand and be able to produce the policies, plans and procedures needed to successfully implement ISO 31000.
- To acquire the competence to communicate effectively about ISO 31000 with people having different backgrounds and experience in risk management.
- Prepare for the GNIC CRMIP certification.

CERTIFICATION OBJECTIVES

- Produce a concise corporate policy or statement.
- Produce a concise risk management plan, including:
  - An articulated risk management commitment
  - Organisational roles, authorities, responsibilities, and accountabilities (Risk owners)
  - An approved approach to communication and consultation
  - Implementation performance indicators
- Produce a concise risk management implementation plan/schedule.

TARGET AUDIENCE

This training is addressed to managers and consultants with a basic knowledge of ISO 31000 (whether or not demonstrated by a certificate) and is ideal for:

- Heads of risk and risk managers responsible for developing and improving risk management in their organization;
- Consultants who assist companies in their development;
- Users of other management standards seeking to integrate risk management;
- SME managers, management and strategic staff;
- Internal or external auditors working with ISO 31000;
- Every person who wants to integrate risk management into their organization, into daily decision-making and at all levels of the organization.

COURSE AGENDA

The program is tailored to the needs of the participants and focuses on the elaboration of the ISO 31000 framework, adapted (customised) to the participants specific situation and input. It comprises the following elements:

- Implementation of the principles – identifying gaps and identifying possible solutions – preparing a statement
- Implementation of the framework – identifying gaps and identifying possible solutions – preparing a risk management plan
- Implementation of the process – identifying gaps and identifying possible solutions – preparing a risk management implementation plan, including the required education, training and resources needed.

PREREQUISITES

- **Knowledge of the ISO 31000 standard:**
  - 2009 and/or 2018 versions. If possible, proven by an appropriate certificate.
- **Familiarity with the own organisation:**
  - Organisational objectives, values, and convictions (what is important and valuable for the organisation and its essential stakeholders)
  - Organisational structure, decision making and delegation.
  - Current risk management practices
  - Available resources

EDUCATIONAL APPROACH

This training is based both on theory and the practical examples of the participants, aiming to integrate the personal cases of the participants as examples for this course.

- Lectures are focused on examining the existing situations, analyse the gaps with ISO 31000 and provide solutions for problems encountered.
- Working with the real cases of the students assists certification preparation.
- A limited number of participants is allowed so that all may benefit from the learning and interactions with peers.

EXAM AND CERTIFICATION

Before starting the course, participants will be invited to participate in an on-line theoretical exam (open book) of 20 multiple choice questions on ISO 31000:2018, to get everyone abreast with the latest version of the standard. This exam is part of the certification requirements.

- Knowledge and understanding of the ISO 31000 standard (proven by the open book on-line exam – 75% required)
- Creation of an initial ISO 31000 framework and its crucial parts, as listed in the section "Certification Objectives".

TRAINER: Peter Blokland, PhD

Peter Blokland, founder of BYAZ bv, studied at the Royal Military School in Brussels (MSc) and had a career in the Belgian Armed Forces and NATO as a Fighter Pilot (F-16), Instructor (Alpha-Jet and SF260M/D), Commanding Officer (5 Sqn), Staff Officer (Training, Flight Safety and Nuclear Operations) and aviation accidents investigator and prevention specialist.

After his active career, he invested in himself through various training courses as a coach, trainer, and entrepreneur. Peter was, and still is, driven by the question of what makes people, teams and organizations excellent. The insights he gained have been collected in his books:

"Total Respect Management" (2013, Lannoo Campus) and "Safety & Performance" (2017, NOVA Science publishers).

It also led to a doctoral study at TUDelft (Faculty of Technology, Policy and Management) where he completed his PhD research, concluded with a dissertation titled: "Towards Sustainable Safety & Performance in Organisations".

Peter is also an expert for the Belgian National Standardisation Body (NBN) for everything that has to do with ISO 31000 (I262).

ABOUT GNIC®

GNIC® is an initiative of an international group of individuals, independent from any interest or pressure group, concerned with the development and usage of high quality, effective and efficient certification services for individuals and legal entities. They operate under the legal entity of a Not For Profit Organisation, according to Belgian Law, named "Global Network for Independent Certification", abbreviated «GNIC». GNIC® is the registered brand name.

GLOBAL: Global stands for the variety of international experts that are at the core of the Global Network for Independent Certification. It also refers to the ambition of having an international and world-wide reach for its services.

NETWORK: GNIC® is a network organisation of independent professionals or their corresponding legal entities. While a small dedicated crew provides for logistic and administrative support, anyone wishing to become part of the network can do so, at least when the values and guiding ethical principles of this network are endorsed.

INDEPENDENT: Independent also means that any individual or legal entity can apply for GNIC® certification, independent from the preparation or education this individual or legal entity has adopted or practiced. As such, GNIC® aims to develop a network of independent professionals and institutes to accomplish this intention.

Last but not least, independent also stands for the fact that GNIC® works through completely independent **ACADEMIC COUNCILS** and **CONTENT COMMITTEES**. These councils independently determine the terms of reference against which individuals and legal entities will be certified and express them in the GNIC® Codex of References. The committees independently translate these terms of reference into GNIC® content and services.

CERTIFICATION: GNIC® takes certification very serious. We don't settle for a certificate for being present or having paid for it. *Everyone receiving a GNIC® certificate can be proud of that achievement*, because it will be earned by passing stringent criteria, whether by passing an exam, demonstrating skills or an extensive survey of required qualities, processes and procedures. For each type of certificate, GNIC® will exactly tell you what the normative references are that you are certified against.
